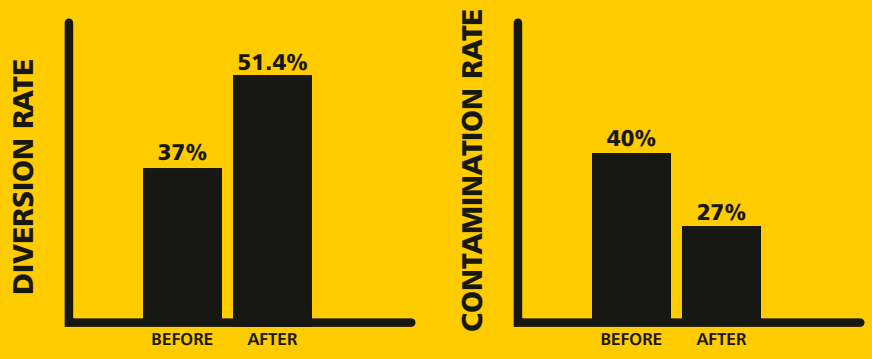
INCREASE RECYCLING EFFECTIVENESS

IN-FIELD RECYCLING CASE STUDY



Improving recycling effectiveness has a positive environmental impact, helps facilities achieve sustainability initiatives, and can lead to cost savings. An in-field trial that utilized colors, labels, and lids with stream-specific opening proved to increase recycling effectiveness.

AN ADAPTABLE RECYCLING SOLUTION

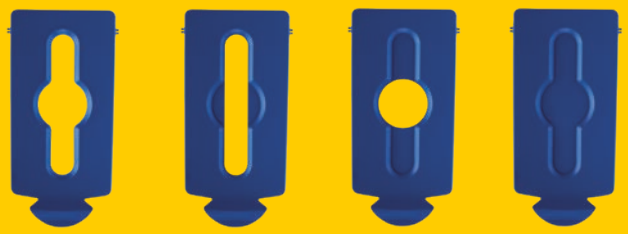
Facilities can choose from multiple colors, container sizes, lid openings, and waste stream labels to customize a recycling station that fits their unique recycling needs.

RECYCLING STATION 1-STREAM KITS

1-Stream kits are available in both 23G & 33G with the most common waste streams.

Each kit comes with all necessary components to outfit a customized recycling station.

WASTE STREAM LIDS



Mixed Recycling | Paper | Bottles/Cans | Closed Lid

WASTE STREAM LABELS

AVAILABLE COLORS

Blue | Red | Yellow | Green | Black | Gray | Brown

SNAP-IN CONNECTOR

Connect bases without the use of tools or hardware.

HINGED LID INSERTS

Accommodate larger-sized recycling material.

VENTING CHANNELS

Make removing liners from both the 33G and 23G bases up to 75% easier*.

BAG CINCHES

Secure liners around the rim of the container and allow for quick, knot-free liner changes.

*Compared to traditional straight wall receptacles

DESIGNED FOR EASE OF USE

Sized to fit. The slim footprint fits in the tightest spaces, while hinging lid inserts allow larger recyclables to easily fit inside.

INTUITIVE RECYCLING

To streamline your system for improved recycling compliance, we recommend the color and waste stream pairings below:

- **BLUE** - Mixed Recycling
- **YELLOW** - Bottles/Cans or Plastic
- **GREEN** - Compost or Paper
- **BLACK** - Landfill
